SUMMARY

I am a junior front-end developer with fundamental knowledge of using HTML, CSS, and JavaScript to create the user interface and appearance of a website or web application. I'm a motivated and meticulous junior front-end developer looking for an entry-level job with an enterprise where I can put my coding abilities to use, tackle challenging problems, and ensure projects are completed on schedule.

EXPERIENCE

Project-Based Virtual Intern : Front End Developer - Core Initiative x Rakamin Academy

Core Initiative

📅 02/2023 - 03/2023   📍 Remote

As a member of the junior development team, my role is to create attractive website pages according to predefined design elements using VueJs. I am also in charge of connecting website pages that have been designed with the API so that the website can run smoothly. Additionally, I interact and discuss with the senior development team to assist them in developing VueJs components, adding new functionality, or addressing issues that arise.

Project-Based Virtual Intern : SEO Outreach - Niagahoster x Rakamin Academy

Niagahoster

📅 03/2023 - 04/2023   📍 Remote

An SEO Outreach using SEMrush and WordPress has extensive expertise in search engine optimization (SEO) as well as the use of SEMrush tools and the WordPress platform. They can perform keyword analysis, optimize content, and monitor website performance using SEMrush. In addition, they also have knowledge about using SEO plugins on WordPress, conducting competitor research, and implementing effective content marketing strategies through WordPress. With this expertise, an SEO Outreach can improve website visibility and ranking, drive organic traffic, and optimize user experience through the use of SEMrush and WordPress.
